

WE SHARE GREAT NEWS WITH HAPPINESS

Coca-Cola Andina is distinguished for the quality of the information that it delivers to the market

Informe Reporta Chile is performed for the first time in our country, a research on the quality of the information that companies forming part of the Selective Stock Price Index (IPSA) make available to shareholders and stakeholders on the occasion of the celebration of the annual general shareholders' meeting.

This report highlighted the IPSA companies presenting the best quality of financial and non-financial information (ESG: Environmental, Social and Governance), where Coca-Cola Andina was leader in ESG transparency and leader of the food & beverages category, achieving second place in the overall ranking.

The general classification of Informe Reporta is obtained based on the scores attained by the universe of companies analyzed in a total of 34 indicators, grouped in three principles: Transparency, Relevance and Accessibility. In Chile, the report is prepared by the Spanish Agency Deva, along with IP-Financialcom and the Center for Business Sustainability of the Universidad Adolfo Ibáñez. In Spain the report already has seven versions.

"This recognition reflects the priority that as a company we have given to permanently seek for the best ways to deliver information to the market. We are convinced that transparency generates value", explained Miguel Ángel Peirano, Chief Executive Officer of Coca-Cola Andina.
