## For the fourth consecutive year Coca-Cola Andina is included in the Sustainability Index of the Santiago Stock Exchange

September 23, 2019

For the fourth consecutive year we are part of the Dow Jones Sustainability Index Chile (DJSI Chile). Additionally, for the third consecutive year, we were also listed on the Sustainability Index of the Latin American Integrated Market-DJSI Mila.

We are convinced of our purpose, **sustainably growth**, and therefore we renew our commitment to achieve results generating value for our shareholders, customers, collaborators, among others; as well as developing the communities where we operate and enriching our planet.

Being a company listed by this prestigious ranking requires us to manage resources better and better and challenge our own limits. Sustainable finances are strongly positioned in the investment sectors, and as a company we believe in this way of making decisions.

*“We have been reporting information to the Dow Jones Sustainability Index for five years, growing steadily and demonstrating to our investors and all our stakeholders the importance of shared value in our company. Transparency and excellence in management are increasingly relevant factors in remaining in the ranking.*

*We thank each of our collaborators who, with their effort and committed work, make it possible for best practices to be a reality in the Company.”* said Miguel Angel Peirano, Chief Executive Officer of Coca-Cola Andina.

**We know where we must go and we invite you to be part of this great commitment!**
